

Discover Gleniffer Braes - Glen Park Maps

2018

I worked alongside two other community artists on the Creative Mentoring Programme to produce a tourist map and an interactive map to highlight the stunning Glen Park area of the Gleniffer Braes. This was commissioned by Invest in Renfrewshire for the doors open day event in September.

We consulted with local people and park rangers to create the maps taking accessibility and areas of interest into consideration.

We created an illustrated tourist map showcasing the history of the area and local wildlife.

With the aim of promoting the positive health and wellbeing benefits of spending time in nature, we also created an interactive activity map that would encourage users to engage mindfully with the park and their surroundings.

The maps were estimated to be accessed by over 200 people over the Doors open weekend.
