

Introduction to Jewellery Making Workshop

Pailsley May 2018

Whilst on the Creative Mentoring Programme with Impact Arts, I delivered an introduction to some jewellery making techniques with a group of young people from the Advanced Creative Pathways Group.

Participants explored wire wrapping and twisting techniques to form rings. Alongside using traditional Jewellery making techniques and tools the group also experimented with new materials such as silk clay.

Although initially some of the group were intimidated by the process but through encouragement and support were emboldened what they achieved.
